Welcome to the Eternal Echoes Society, a research-based organization dedicated to exploring the mysteries of the soul, reincarnation, and life beyond death. We believe that consciousness extends beyond the physical form and that our spiritual essence continues to evolve across lifetimes. Drawing from cross-cultural studies, spiritual traditions, and firsthand accounts, our work seeks to understand the journey of the soul - its cycles of rebirth and its occasional entrapment in the liminal spaces between lives.

The Eternal Echoes Society was born from the life's work of its founder, Dr. Eloise Vay, a spiritual anthropologist and intuitive researcher whose lifelong fascination with the soul's journey began in childhood. As a young girl, Eloise experienced vivid dreams of places she had never visited and lives she had never lived - memories that felt more real than imagination. These early visions led her on a path of deep study into reincarnation, ancestral memory, and spiritual traditions from around the world, blending academic rigor with an openness to the unseen.
